## Industrial Delivery Robot

The Neutron NT300 is a versatile delivery robot designed for material transport in industrial environments and heavy-load delivery in commercial settings. It features a robust, load-bearing chassis with an open architecture and includes an operational screen for user convenience. The robot can handle loads up to 300kg and is equipped with essential IoT capabilities such as elevator control, gate navigation, and remote paging functionality. It also provides extensive software and hardware interfaces, making it easy to integrate with existing software systems and expand with additional hardware.

# Key Features

Superior Mobility

300kg Load Capacity

Multi-modal Interaction

7/24 Non-stop Operation

Diversified Attachments

Flexible Vslam+ Positioning

360° Omni-Sense Safety

ISO 3691-4 Standard

# Product Introduction

# Product Specifications

Machine Dimension	78cm*50cm*134cm
Machine Weight*	60kg
Loading Capacity	Maximum 300kg
Run-time	12h (none load) , 6h(fully load)
Battery Capacity	30Ah
Charging Time	2h (from 0% to 90%)
Cruise Speed	Maximum 1.2m/s
Threshold Overcoming Height	Maximum 20mm
Groove Crossing Width	Maximum 35mm
Path Clearance	Minimum 60cm
Navigation Methods	VSLAM & Lidar SLAM

\*The NT300 with lifting functionality will weigh approximately 80kg.

About NEUTRON

# VSLAM+ for Rapid Deployment Across Vast Venues

## Precision Meets Presence

- The NT300 utilizes the Neutron original **VSLAM+ technology** and is classified as an AMR. Unlike traditional AGVs, it does not depend on preset physical path markers but rather navigates freely using an advanced visual positioning system. This allows the NT300 to **quickly adapt to changes in production layouts without the need for time-consuming reconfiguration or facility remodeling.**
- Operation even in high ceiling environment up to **30 meters**
- Extra large scene mapping for up to **200,000m<sup>2</sup>**
- Deployment time is reduced by **70%** compared to traditional AGVs, while the use of a built-in mapping tool boosts mapping efficiency by an additional **30%**.

# 360° Omni-Sense Safety

- The NT300 industrial delivery robot sets a high standard in safety, meeting the stringent ISO 3691-4 guidelines for industrial vehicles. Its advanced safety features ensure reliable operation within the ever-changing landscape of factory settings.
- At the heart of its safety suite are cutting-edge LiDAR sensors, which provide a 360-degree scan of the robot's surroundings to detect objects and navigate with precision. Depth cameras offer an additional layer of spatial awareness, allowing the NT300 to accurately measure distances and effectively avoid collisions.

# Multi-Robot Collaboration

## NEUTRON Scheduler System

- Powerful self-organized network
- Dispatch up to 20 robots in one environment
- Realtime environmental perception
- Automatically detour for traffic congestion
- Adapt to complex and dynamic scenarios
- Allow painless collaboration among robots

# Auto & Semi-auto Delivery Modes

## Auto-delivery Mode

The NT300 is capable of autonomous navigation and can deliver goods to any designated destination. Additionally, you can swiftly adjust the maps to accommodate changes in the production line.

## Follow Mode

The NT300 employs visual recognition technology to facilitate an orderly queuing and following mechanism among multiple robots, a system primarily used for material preparation and the transportation of assorted goods.

## Power-assist Mode

When manual intervention is required for specific tasks or map generation, the NT300 is equipped with an electric power-assist system to facilitate hand-pushing operations, thereby enhancing delivery efficiency and convenience.

# Versatile External Attachments

## Expand Your Capabilities with NEUTRON Attachments

The diversified expansion of applications significantly enhances the robot's adaptability and versatility, thereby increasing operational efficiency and simplifying procedures, ensuring a more efficient, smooth, and seamless delivery process.

**Standard Mode**

**Shelf Mode**

**Lifting Mode**

**Towing Mode**

# Versatile External Attachments

## Features

Large capacity

Multi-level carrying space

Fully automated delivery and loading/unloading

Flexible integration with existing carriers

## Scenarios

Large-scale material box transport

Multi-site small or medium material transport

Multi-site small or medium material transport

Materials need to be transported using existing wheeled carriers

# Exceptional Adaptability to Different Sites

## Exceptional mobility to navigate various obstacles

Boasting an exceptional 60cm path clearance, the NT300 ensures agile maneuverability in narrow human-robot cohabited spaces, effortlessly overcoming 20mm thresholds and 35mm grooves. It facilitates precise material transport between production lines and is designed to meet elevator control requirements.

# Round-the-clock Operation

## 24/7 Non-stop Operations

- **8 hours of continuous work, 2 hours for rapid charging**
- The NT300 offers an 8-hour battery life and supports a fast 2-hour(from 0% to 90%) charging capability. Equipped with both automatic recharging and battery replacement options, it ensures uninterrupted service to fulfill round-the-clock operational requirements.

# Stabilized Delivery

- The newly **upgraded vehicle-grade chassis** and motion control algorithms **enhance delivery stability**, making it suitable for delivering various materials in diverse scenarios.
- Enhanced with **shock-absorbing technology**, our upgraded automobile-level adaptive suspension significantly improves the stability of NT300.

# Multimodal Interaction

Press-to-go Button

High-brightness Operation Indicator

# IOT Capabilities

Equipped with expansive IoT capabilities, NT300 supports elevator control, e-gate access, and various other smart connectivity solutions. Featuring multiple remote calling functions such as pagers and app-based calling. Additionally, it offers software API interfaces for seamless system integration. Outfitted with external power supply ports and USB outlets for convenient hardware device integration.

Peripheral Interface

APP Control

Pager

Elevator Control Module

E-gate Control Module

Bluetooth Speaker

About NEUTRON

A 3D isometric rendering of a factory floor. The scene includes various industrial equipment such as conveyor belts, processing machines, and storage racks. There are several callout boxes with white backgrounds and black text, each pointing to a specific area of the factory. The floor is light gray, and the equipment is rendered in shades of blue, yellow, and gray. The overall scene is brightly lit, creating soft shadows.

**Line-Side Delivery**

**Work-in-progress Delivery**

**Delivery from Work-in-progress to Final Products**

**Quality Inspection Delivery**

**NT300 Engagement in Industrial Delivery Processes**

# Product Value

## Enhanced Efficiency

The NT300 increases operational throughput by autonomously navigating through industrial environments, reducing delivery times and increasing productivity.

## Improved Safety

With advanced sensors and safety features, the NT300 minimizes the risk of accidents in the workplace by detecting and avoiding obstacles, ensuring safer interactions between machines and human workers.

# Product Value

## For Customization

The NT300 can be customized with different attachments or software configurations to meet specific industrial needs, ensuring it can adapt to various tasks and environments without requiring multiple separate machines.

## For Sustainability

The NT300 is engineered for optimal energy use, featuring advanced lithium-ion battery technology and energy management systems that ensure longer operation times while consuming less power, thus decreasing overall energy costs and environmental impact.

About NEUTRON

# NEUTRON

## Robotics

Neutron has become a brand capable of producing many electronic hardware and software by adding new ones to its technology journey that it started with security systems.

Neutron, which always brings innovations to its users with its self-updating structure, delivers its products to nearly 80 countries, especially its homeland Turkey, through its dealer network and electronic commerce structure.

Neutron is the first brand in Turkey to make and manage its own mobile application. It offers completely free service with its mobile applications reaching 10 million users.

Neutron, which has accomplished great things in the field of security systems, in public and private areas, banks, airports, business centers, industrial sites and many other areas, maintains the same success in smart life products. With the NEUTRONLIFE mobile application and roof software, it produces nearly 50 thousand smart products and offers them to use from its own mobile application.

In addition to these, Neutron, which broke new ground in Turkey in the field of Robotics, is the first product of its investments in artificial intelligence, with Service and companion robots, in restaurants, hospitals, factories, etc. in areas such as

Neutron has virtually led the way in water with its latest innovations in water purification systems. It provides significant benefits to both users and nature, such as having a system concept that does not require service and having very low wastewater amounts.
